

# Arguments

## Unit 1

# ABSTRACT study of ARGUMENTS

Arguments are made  
of STATEMENTS

Statements are sentences  
that are T (true) or F (false)

What are non-statements?

[rabbittooth.com](http://rabbittooth.com)

Premises

Support

Goal!

Conclusion

Deductive arguments are CERTAIN

Inductive and Abductive arguments are FALLIBLE

What is a **good** deductive argument?

Two senses of good: **VALID** and **SOUND**

A deductive argument is **valid** iff:

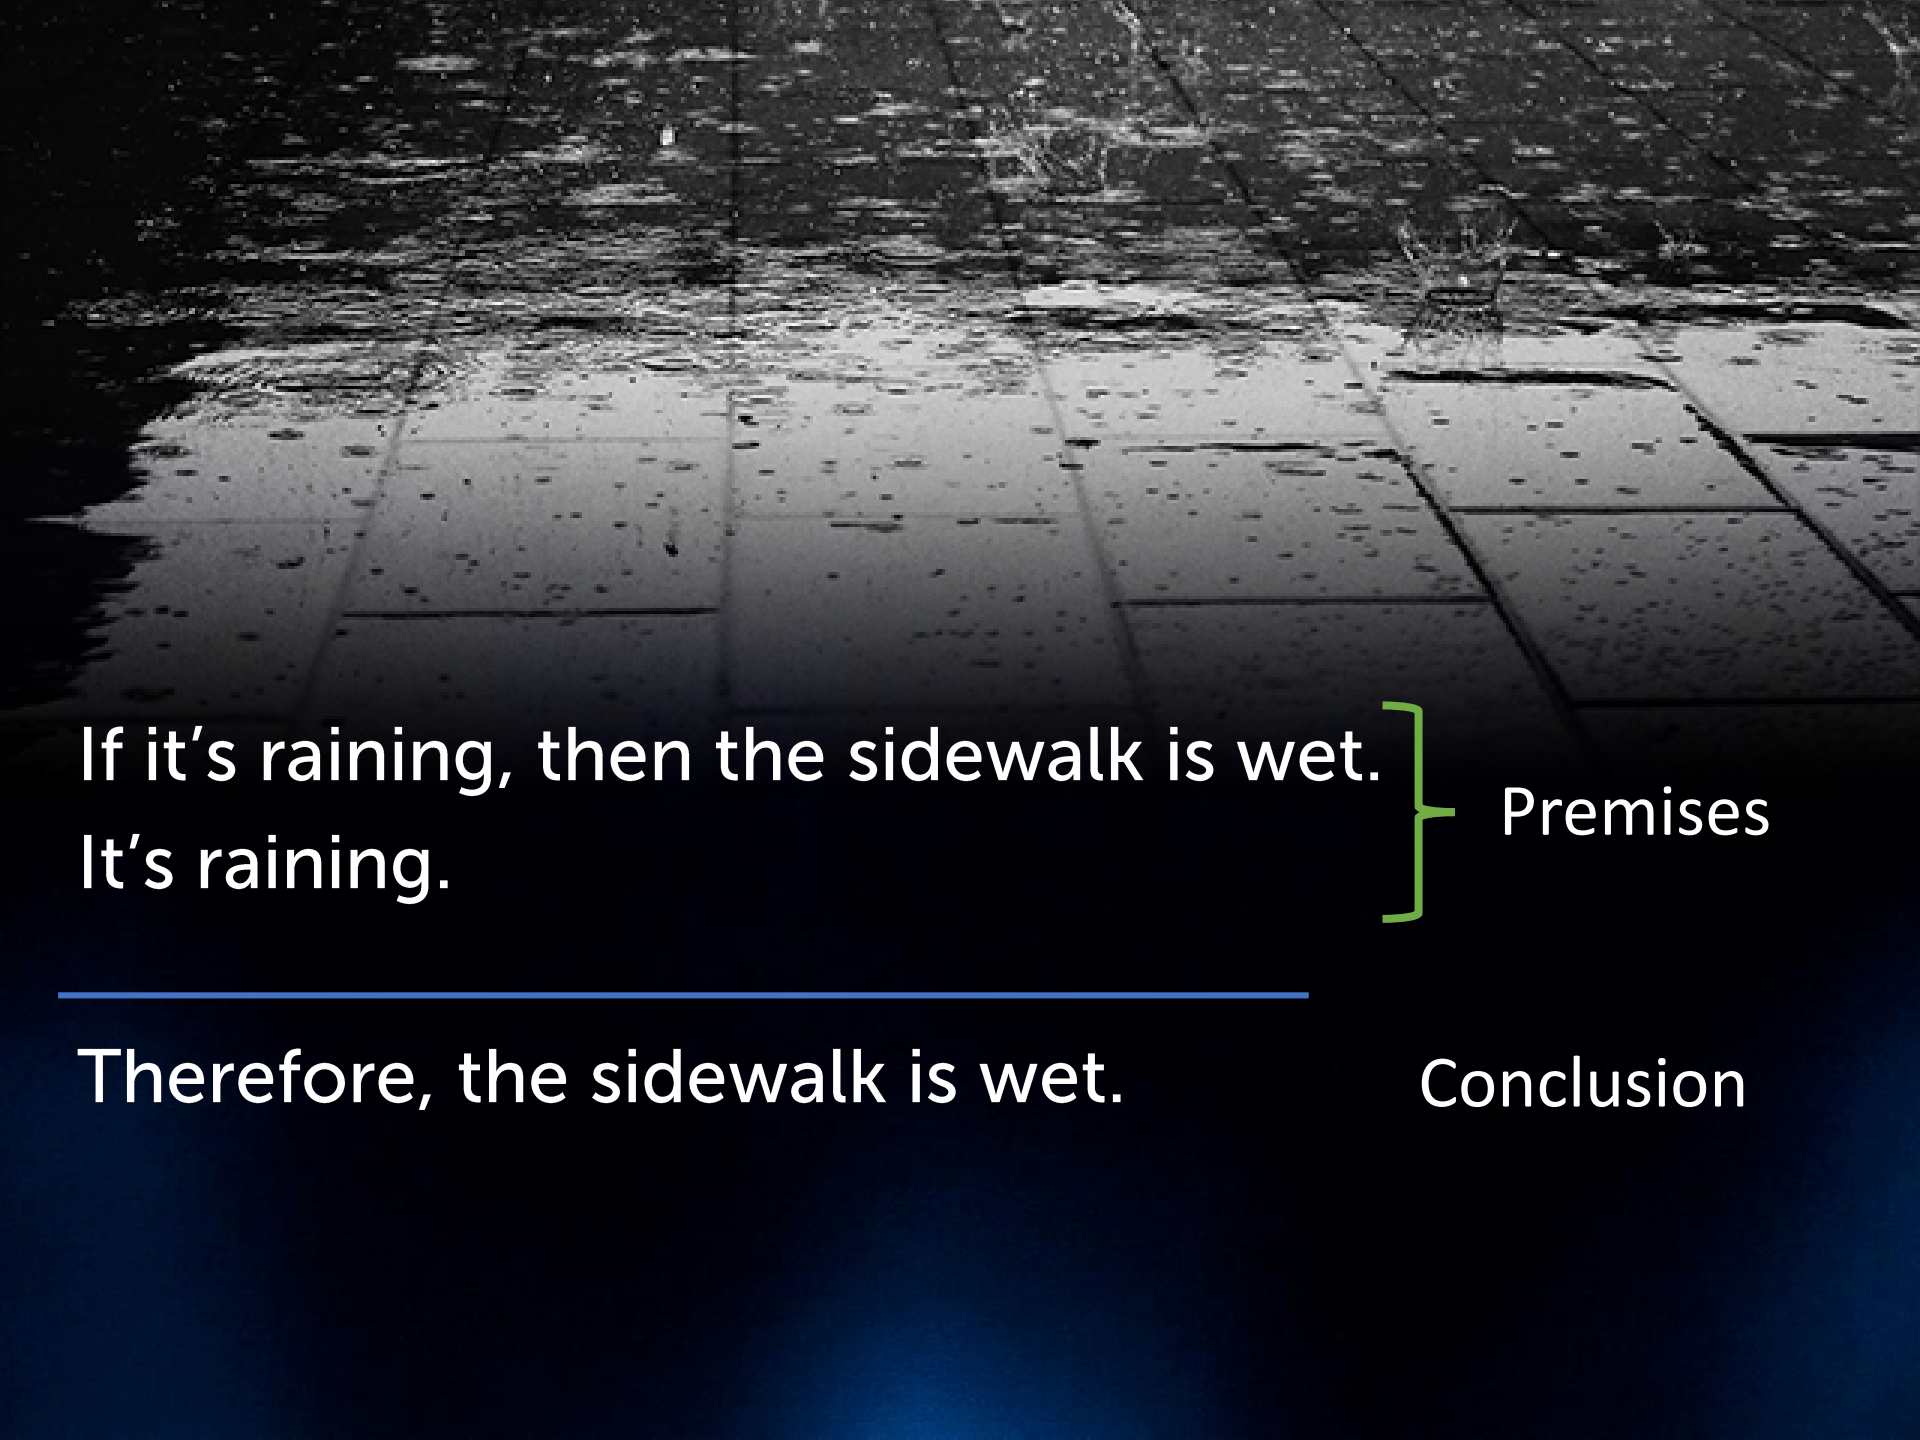

whenever the **premises** are **true**  
the **conclusion** must be **true**

or

it is **IMPOSSIBLE** for the **premises** to  
be **true** and the **conclusion** to be **false**

A black and white photograph of a wet sidewalk. In the foreground, there is a large, dark puddle reflecting light. To the right, a glass of water sits on the sidewalk, with water spilling out from its base. The sidewalk is made of rectangular tiles.

If it's raining, then the sidewalk is wet.  
It's raining.

} Premises

---

Therefore, the sidewalk is wet.

Conclusion

If it's raining, then the sidewalk is wet.  
The sidewalk is wet.  
Therefore, it's raining.

If it's raining, then the sidewalk is wet.  
The sidewalk is not wet.  
Therefore, it's not raining.

i

Mentimeter

Is this argument **VALID** or **INVALID**?

**Validity** has nothing to do with content and everything to do with **FORM** or **STRUCTURE**

This bettlewind is nuzzling green or time.  
It is not nuzzling time.  
Therefore it is nuzzling green.

This means that **TRUTH** is irrelevant as well!

If unicorns roam UofT campus, then I  
will give you all 100%. Unicorns do  
roam the campus, so you'll all get perfect!

A deductive argument is **INVALID** iff:

it is **not** valid

or

it is **POSSIBLE** for the **premises** to be **true**  
**AND** the **conclusion** to be **false**

TIP: It is often **easier** to test for invalidity

Either you're good at math or  
you're good at philosophy.

I'm good at philosophy.

Thus, I'm not good at math.

Non-Sequitur

# Two Important Terms

## TAUTOLOGY

- A **sentence** is a tautology if it is **always true**, or it can never be false
- It is raining OR not raining
- "It is BLAH or not BLAH"

## CONTRADICTION

- A **sentence** is a contradiction if it is **always false**, or it can never be true
- It is raining AND not raining
- "It is BLAH and not BLAH"

# Some Tricky Arguments

I like cheese. Therefore, I am either tired or not tired.

Go to [www.menti.com](https://www.menti.com) and use the code **64 23 24**

Is this argument **VALID** or **INVALID**?

# Some Tricky Arguments

I'm awesome. I also don't like cats. Therefore, I'm awesome.

Go to [www.menti.com](https://www.menti.com) and use the code **64 23 24**

i

Is this argument **VALID** or **INVALID**?

Mentimeter

Remember:

Validity is all about **FORM** and **STRUCTURE**,

and not about content and truth

A deductive argument is **SOUND** iff:

1. It is **VALID**

2. **ALL** the **PREMISES** are **TRUE**

Form, content **AND** truth all matter!

INDUCTIVE arguments  
are not valid or sound

They are STRONG or COGENT

A cogent inductive argument  
CAN have a false conclusion

This swan is white.

This other swan is white.

Every swan I have ever seen is white.

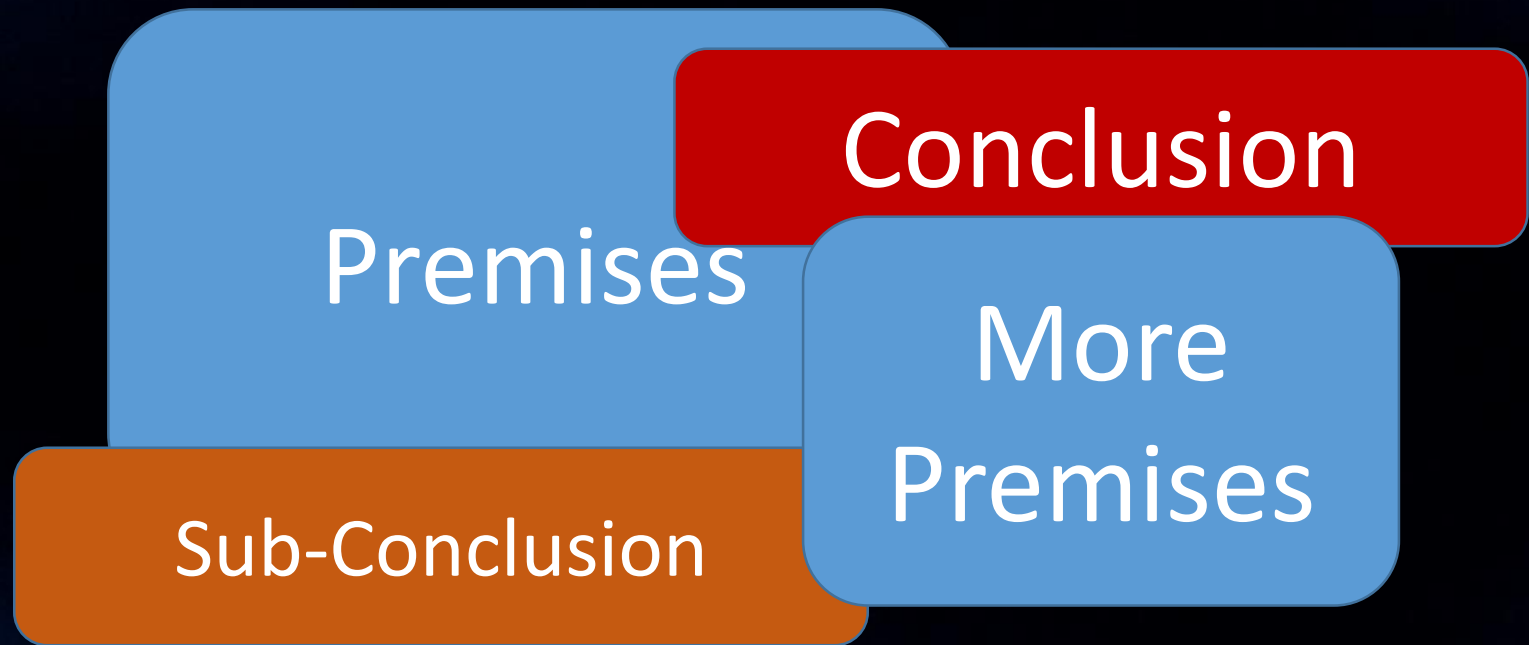

Therefore, all swans are white.

Premises

Conclusion

# Critical Reasoning

# Premise Indicators

because

since

as

for

as shown by

follows from

as indicated by

in the first place

you can see from

seeing that

for the reasons

that

assuming that

being that

inasmuch as

may be inferred  
from

can be deduced  
from

whereas

on account of

due to the fact that

suppose that

let us agree that

if one thinks that

# Conclusion Indicators

therefore

thus

so

hence

then

in conclusion

accordingly

consequently

as a result

it follows that

for this reason we  
see that

it can be inferred  
that

we can conclude  
that

we can deduce

proves that

shows that

indicates that

this makes it clear  
that

it must be that

it cannot be  
denied then that

Some words are **AMBIGUOUS** indicators

You need to use **context**

Culprits: because, for, thus, since, and more

EXPLANATIONS are not arguments

The goal of an argument is to convince you of the conclusion

The goal of an explanation is to give an account for why the 'conclusion' happened

The Blue Jays will win the division **since**  
they are the best team.

**Since** my dog ate my homework,  
I did not hand in my assignment.

# Validity
